

WunderWall Measuring Guide

1 Before You Begin:

The most important step when ordering your WunderWall mural is to take accurate measurements of the space you're wanting to cover.

Be sure to use a tape measure that has inch increments - you'll be asked to enter your measurements using inches.

Most homes aren't level or plumb so be sure to use a level when measuring to ensure your measuring tape is level or plumb. You'll want to record the longest measurement for each direction. Don't worry about adding extra room for installation, we automatically include extra material for easy installation.

REQUIRED TOOLS:

Level

Tape measure that measures in inches

2 Measure Width

Make sure you are measuring the entire width of your wall.

Include the width of any of obstructions in those measurements like trim, moulding, light switches, outlets, windows, and doors.

Use the level to make sure your tape measure is accurate.

Use the illustration on the next page to record your measurements.

3 Measure Height

Make sure you are measuring the entire height of your wall.

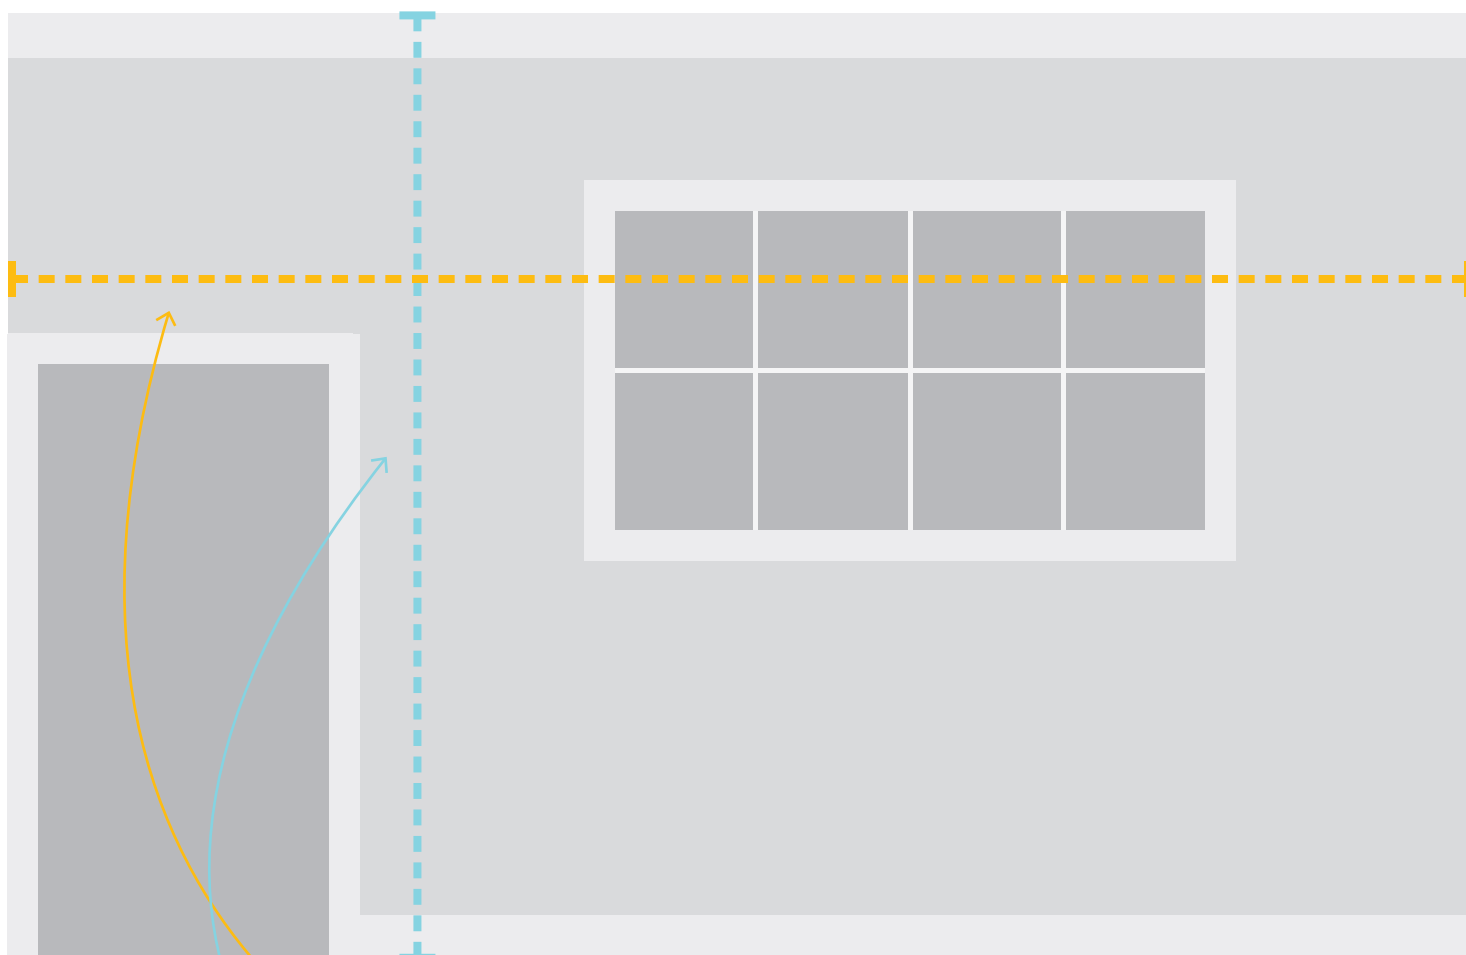

Measure from floor to ceiling, and be sure to include any crown moulding or baseboard in your measurements.

Use the level to make sure your tape measure is accurate.

Use the illustration on the next page to record your measurements.
